## (54) PRODUCTION OF COFFEE DRINK

### (57)Abstract:

PROBLEM TO BE SOLVED: To provide a method for producing a coffee beverage containing a milk constituent and coffee having a good flavor by eliminating an influence of a stabilizer for a milk component on flavor.

SOLUTION: A milk component is sterilized. A coffee raw material is separately wetted and sterilized under closed conditions and then extracted to prepare a sterilized coffee solution. The milk component is mixed with the coffee solution and packed into a container. Preferably, the wetting and the sterilization of the coffee raw material are carried out by steam at 100-120°C for 5-10 minutes.
